Satellite

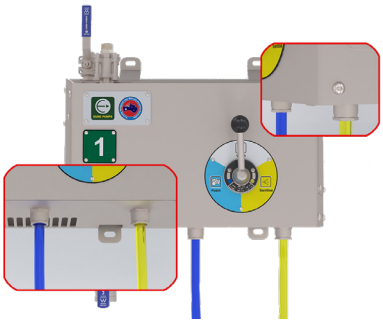

Reliable, Serviceable, and Long-Term Value

This satellite allows for washing and foaming applications all in one unit. It is built for reliability and easy servicing, making it a long-lasting option that reduces downtime and replacement costs compared to other brands. It works with all pressures, so it can be added to your existing cleaning setup with very little extra investment.

Australian-Made for Fast Support

Because it's made and supported in Australia, you get easy access to maintenance. We also offer onsite support, service plans, installation help, and in-person training. giving you a level of support that sets us apart from competitors.

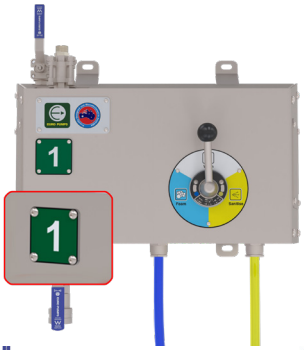

Low Pressure 4~20bar | **Med Pressure 20~40bar** | **High Pressure 40~150bar**

Tamper Proof

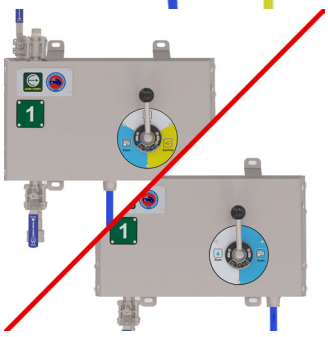

Tamper proof Chemical suction hose - Stainless steel compression gland prevents the chemical suction hose from being pulled out. This prevents the insert that controls the injectors titration from be removed and results in an improved lifespan between services.

Tamper proof cover - A cover that requires tooling to remove helps prevent unauthorized access and subsequent altering of air pressure which will result in lower quality foam. This feature makes this foaming satellite truly set and forget.

Identification

Number Plate: A number plate allows easy identification for an in-house or external maintenance plan. This feature means keeping records and problem solving is made much easier.

Flexible Options

The Euro Pumps Satellite has options for the desired number of chemical injection chambers to suit your needs. Options range from single, and double, injection points. This allows for potential savings if the chemicals you use are safe to mix or in the contrary gives an all-in-one package that separates hazardous chemicals. This paired with the ability to turn the compressed air on and off to allow foaming with sanitiser makes this satellite a great flexible option for whatever your requirements may be.

Low Pressure Satellite

Ideal Starter System, Low Cost, Low Pressure

With easy integration and little requirements to run, the Euro Pumps Low Pressure Satellite is a simple and effective way to clean your factory. It's best suited to basic cleaning applications that are lower to reach such as walls, floors and factory equipment. If simplicity and ease of installation is your priority, this satellite is simply unmatched in performance.

Applications:

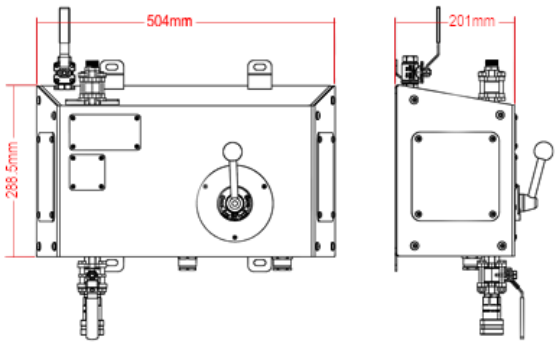

- Walls
- Floors
- Factory Equipment
- Boot Rooms
- Wash Up
- Tubs and Trays
- Amenities
