A smarter cleaning solution

Fan Cooled to Run Hotter Longer

Euro Pumps allows you to clean on demand anywhere in the plant, inside or outside. It will work reliably at temperatures exceeding 85°C.

Perfectly balanced, move with one hand

It's perfectly balanced for easy movement around the site.

Built-in protection for longer life

The EP50-75.SRT Pump system PLC monitors pump condition for asset protection and long platform life.

Wall Mount Option

Euro Pumps SRT Satellite is also available in a wall mount with built-in programs that allow you to select hot and cold water supply, via electronic solenoid control

Sensors & Information

The sensors that make the Euro Pumps EP50-75.SRT the smarter platform allowing you to clean faster, with better flow and at higher temperatures.

- Flow sensor
- Pump pressure
- Oil pressure
- Water temperature
- Auto Phase Rotation
- E-Mode available on request

Australian made, designed and supported

Your Euro Pumps EP50-75.SRT platform is a stationery or mobile cleaning platform which can clean anything within a food production facility. Euro Pumps not only design and manufacture our equipment, we use them every day in our own contract cleaning. So we can ensure that your machine will work the way we say it will.

Your unit will wash, foam, sanitise.

Euro Pumps is an Australian based business, that is focussed on after sales service.

Euro Pumps starts with just one Mission; to create the best purpose designed and built food production cleaning equipment anywhere in the world. We take enormous pride in the fact that we don't just build products, we use them in real-world applications every day, and every lesson learnt is feedback into the design and improvement of our products.
